

Proposal for participation in the ‘Data Sharing Interest Group’

- Preparing policy and technology for data sharing and reuse in the AI era -

Objective

This data sharing interest group will explore AI applicable data and practical ways to remove barriers to data utilization.

- Explore publicly available data from grey literature organizations
- Introduce data collection, construction, and sharing case studies of each organization
- Explore the technical and policy directions required for AI service of the data

Agenda

To pursue these objectives, the interest group will include activities, such as

- Identifying data resources in complex information landscapes
- Explaining the importance of the provenance, validity and quality of that data in order to understand how it can be appropriately used
- Explaining what data can be used for and what not according to copyright, IPR etc.
- Describing data usage standards and the value of doing so
- Promoting the value of data sharing, their openness and interoperability

Target Participant Organizations

There are three categories of interest group participant organizations

1. A data providing organization
2. A data user organization
3. Both a data providing and user organization

Course of Action

- The interest group is open and mutually beneficial for all organizational participants
- Five of the data providing organizations will guarantee the formation of this proposed interest group and serve in its leadership
- Each data providing organization will deliver a presentation dealing with its current status and practices
- Interest group activities will include periodic online meetings

Expected Outcomes

- The Interest Group can provide guidance and/or recommendations on AI utilization of grey literature data.
- Cases of collaboration for AI service development may be furthered

Intent of Participation

‘Data Sharing Interest Group’

- Preparing policy and technology for data sharing and reuse in the AI era -

1. Contact information

Participant name	
Organization	
Role / Position	
Email	

2. Type of participation (Please check only one box below)

- ☐ Data providing organization
- ☐ Data collection and utilization organization
- ☐ Both

3. Area of expertise (Multiple responses are possible)

- ☐ Data policy building and license management
- ☐ Data collection and construction
- ☐ Data processing technology development
- ☐ Data service and sharing
- ☐ Data application (research, analysis, data-reuse, etc.)

4. What is your incentive for participating in this interest group? (Please describe freely)

5. Do you have any recommendations and/or expected outcomes for participating in this interest group (Please describe freely)

Upon completion of the form please email to jay.kim@kisti.re.kr
